

DJ TECHNICAL GUIDE

zackmckinney.com | Victoria, Virginia

Modified: May 2015

OVERVIEW

The following is to help both yourself, the venue and the DJ ensure a successful, fun event. If any of the below conditions cannot be met, please alert the DJ at zachary@zackmckinney.com.

LOAD IN / LOAD OUT TIME

We will work as quickly as possible to load in and load out and all equipment in a safe manner. Typically our setup takes about 2 hours and our breakdown takes approx. 1 hour - 1.5 hours. Please note, depending on our setup, our time may take less than listed above.

SPACE REQUIREMENTS

Our setup requires the following space requirements.

Minimum Stage Size:

WIDTH: 15 feet

DEPTH: 8 feet

Recommended Stage Size:

WIDTH: 20 feet

DEPTH: 10 feet

ELECTRICAL

We require a minimum of one (1) 120V (volt) 15A or greater (amp), grounded electrical receptacle with 2 or more outlets. This receptacle must be within 50 feet of the DJ setup location and no other items may be connected to this receptacle. Two (2) grounded receptacles are recommended, but not required. If this is not possible, please alert us as soon as possible so that other arrangements may be made with placement of equipment in the venue.

TABLE

We require one table, with a minimum size of 4 foot in length, by 2 foot in width (rectangle shape only). This table must be able to withstand a minimum of 150 pounds. If no table is provided, please let the DJ know within a minimum of one (1) week from the event date so that arrangements can be made. Please note, equipment will be placed on top of the table. We are not liable for any damages to the table.

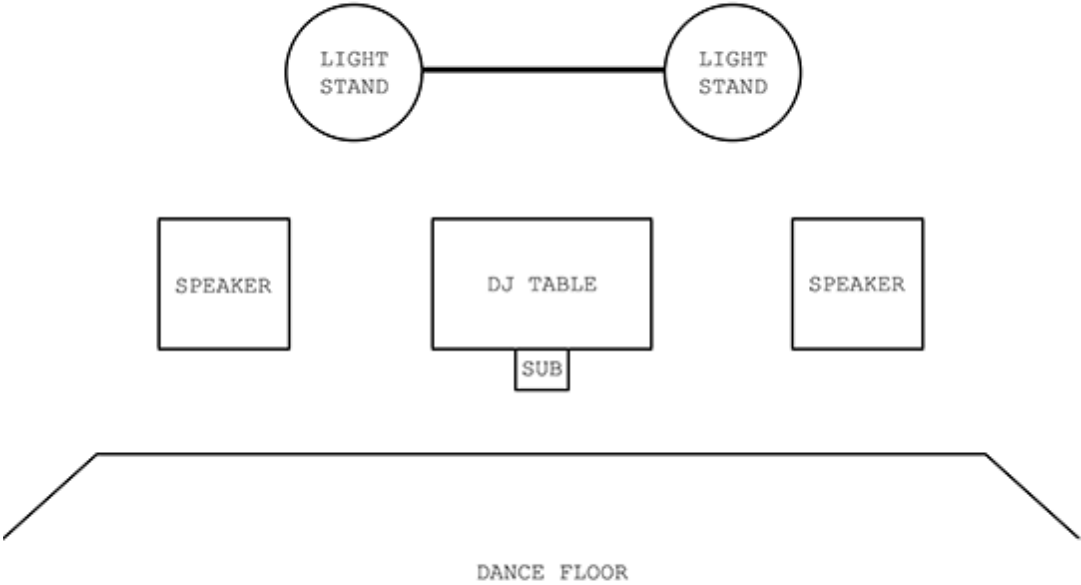

SPEAKER PLACEMENT

Two speakers, "mains," must be placed within a max of 40 feet of the DJ's table. In our recommended setup (see below) the speakers are not located 40 feet from the table, but only a few feet away. This provides for the best optimum sound quality. The subwoofer must also be within this max 40 foot range. Typically the sub is placed under or near the DJ's table (see below).

OUTSIDE EVENTS

If the event is held outside, Zachary McKinney Photography, Web Design and DJ, reserves the right to use a 10x10 foot canopy to cover equipment if the event is not under a covered tent or building. Our canopy is white in color and will match any event color scheme.
